# Direct simplifications of TELA

## Acceptance simplifications

$$(\text{Fin}(\textcircled{0}) \vee (\text{Fin}(\textcircled{1}) \wedge \text{Fin}(\textcircled{2}))) \vee (\text{Inf}(\textcircled{2}) \wedge \text{Fin}(\textcircled{4})) \vee \text{Fin}(\textcircled{3}) \wedge \text{Inf}(\textcircled{5})$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(\textcircled{0}) \vee (\text{Fin}(\textcircled{1}) \wedge \text{Fin}(\textcircled{2})) \vee (\text{Inf}(\textcircled{2}) \wedge \text{Fin}(\textcircled{4})) \vee \text{Fin}(\textcircled{3})) \wedge \text{Inf}(\textcircled{5}) \\
 = & (\perp \vee (\top \wedge \text{Fin}(\textcircled{2})) \vee (\text{Inf}(\textcircled{2}) \wedge \text{Fin}(\textcircled{4})) \vee \text{Fin}(\textcircled{3})) \wedge \text{Inf}(\textcircled{5})
 \end{aligned}$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5)
 \end{aligned}$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(2)) \wedge \text{Inf}(5)
 \end{aligned}$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4))) \wedge \text{Inf}(5)
 \end{aligned}$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\overline{\text{Fin}}(2) \wedge \text{Fin}(4))) \wedge \text{Inf}(5)
 \end{aligned}$$

## Acceptance simplifications

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\overline{\text{Fin}}(2) \wedge \text{Fin}(4))) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\top \wedge \text{Fin}(4))) \wedge \text{Inf}(5)
 \end{aligned}$$

## Acceptance simplifications

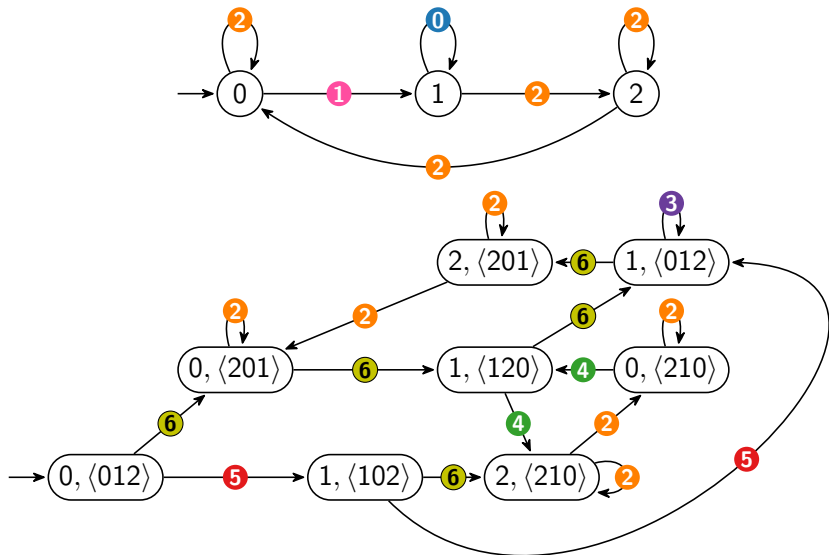

$$\begin{aligned}
 & (\text{Fin}(0) \vee (\text{Fin}(1) \wedge \text{Fin}(2)) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\text{Inf}(2) \wedge \text{Fin}(4)) \vee \text{Fin}(3)) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee (\overline{\text{Fin}}(2) \wedge \text{Fin}(4))) \wedge \text{Inf}(5) \\
 = & (\text{Fin}(2) \vee \text{Fin}(4)) \wedge \text{Inf}(5)
 \end{aligned}$$

# Converting TELA to TPA

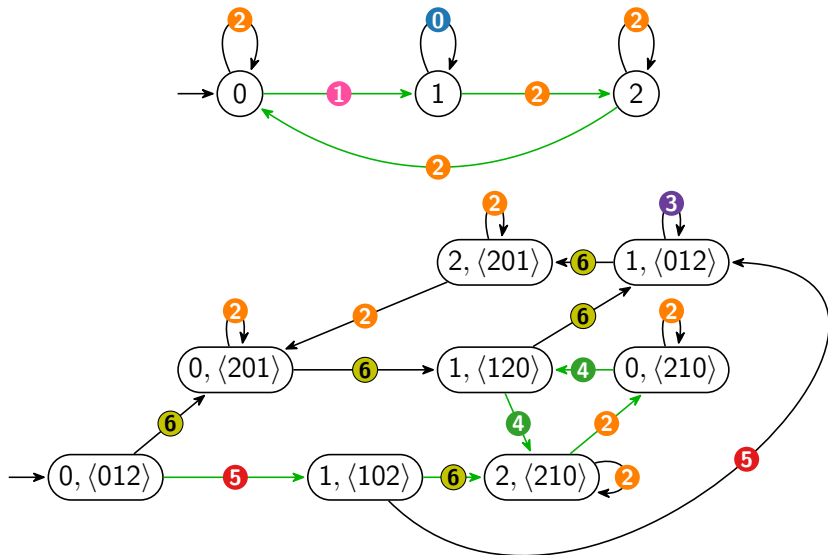

## CAR: color appearance record

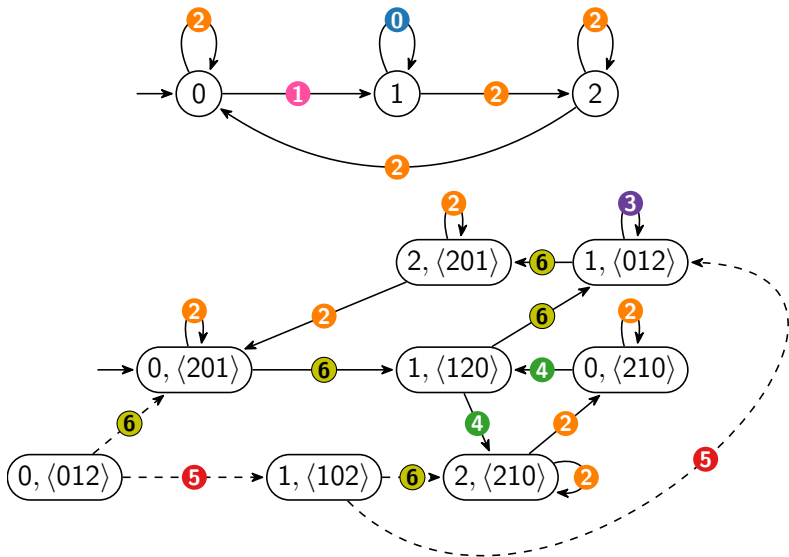

## CAR: color appearance record

## CAR: color appearance record

## CAR: color appearance record

## CAR: color appearance record

## CAR: color appearance record

# IAR: index appearance record

# Improvements

# Degeneralization

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

# Degeneralization

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

# Degeneralization

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

# Degeneralization

$$\text{Inf}(0) \wedge \text{Inf}(1)$$

$$\text{Inf}(0)$$

## Partial degeneralization

$$\begin{aligned} & \text{Inf}(2) \vee \\ & (\text{Fin}(3) \wedge \\ & \text{Inf}(0) \wedge \text{Inf}(1)) \end{aligned}$$

$$\begin{aligned} & \text{Inf}(2) \vee \\ & (\text{Fin}(3) \wedge \text{Inf}(4)) \end{aligned}$$

# Partial degeneralization

$$\begin{aligned} & \text{Inf}(2) \vee \\ & (\text{Fin}(3) \wedge \\ & \text{Inf}(0) \wedge \text{Inf}(1)) \end{aligned}$$

$$\begin{aligned} & \text{Inf}(2) \vee \\ & (\text{Fin}(3) \wedge \text{Inf}(4)) \end{aligned}$$

## Propagation of colors

A color common to incoming transitions (excepted loops) can be added to outgoing transitions and vice versa

$$(\text{Fin}(3) \wedge \text{Inf}(4)) \vee \text{Inf}(2)$$

$$\text{Inf}(2)$$

## Büchi-type

# General algorithm

## Worst case

From an automaton with  $n$  states,  $k$  colors,  $\ell$  Rabin/Streett pairs, we have:

CAR:  $n \cdot k!$  states,  $2k + 1$  colors

IAR:  $n \cdot \ell!$  states,  $2\ell + 1$  colors

Partial degeneralization:  $k \cdot n$  states,  $k + 1$  colors

Büchi-type:  $n$  states, 1 color if possible

## Example

$$\begin{aligned}
 & (\text{Inf}(2) \wedge \text{Fin}(1)) \vee \\
 & ((\text{Inf}(2) \vee \text{Inf}(1)) \wedge \\
 & \quad \text{Fin}(0) \wedge \\
 & \quad (\text{Fin}(1) \vee \text{Fin}(3)))
 \end{aligned}$$

$$\begin{aligned}
 & (\text{Inf}(2) \wedge \text{Fin}(1)) \vee \\
 & ((\text{Inf}(2) \vee \text{Inf}(1)) \wedge \\
 & \quad \text{Fin}(0) \wedge \text{Fin}(4))
 \end{aligned}$$

$$\begin{aligned}
 & (\text{Inf}(2) \wedge \text{Fin}(1)) \vee \\
 & ((\text{Inf}(2) \vee \text{Inf}(1)) \wedge \\
 & \quad \text{Fin}(0))
 \end{aligned}$$

$$\begin{aligned}
 & (\text{Inf}(2) \wedge \text{Fin}(1)) \vee \\
 & ((\text{Inf}(4) \vee \text{Inf}(1)) \wedge \\
 & \text{Fin}(0) \wedge (\text{Fin}(1) \vee \text{Fin}(3)))
 \end{aligned}$$

$$S+P$$

$$\underbrace{(\text{Inf}(2) \wedge \text{Fin}(1))}_{\text{Rabin pair } p_0} \vee \underbrace{(\text{Inf}(1) \wedge \text{Fin}(0))}_{\text{Rabin pair } p_1}$$

$$IAR$$

$$S+P$$

$$\longrightarrow$$

$$\begin{aligned}
 & (\text{Inf}(2) \wedge \text{Fin}(1)) \vee \\
 & ((\text{Inf}(4) \vee \text{Inf}(1)) \wedge \\
 & \text{Fin}(0) \wedge (\text{Fin}(1) \vee \text{Fin}(3)))
 \end{aligned}$$

$$\text{Inf}(2) \wedge \text{Fin}(1)$$

renumber  
 $\longrightarrow$

$$\text{Fin}(1) \wedge \text{Inf}(0)$$

*parity max even*

$$(\text{Inf}(2) \wedge \text{Fin}(1)) \vee ((\text{Inf}(4) \vee \text{Inf}(1)) \wedge \text{Fin}(0) \wedge (\text{Fin}(1) \vee \text{Fin}(3)))$$

CAR of  $SCC_1$ ,  
adjusted for *max odd*

IAR of  $SCC_2$

$SCC_3$ , adjusted  
for *max odd*

$$\text{Fin}(6) \wedge (\text{Inf}(5) \vee (\text{Fin}(4) \wedge (\text{Inf}(3) \vee (\text{Fin}(2) \wedge (\text{Inf}(1) \vee \text{Fin}(0)))))))$$

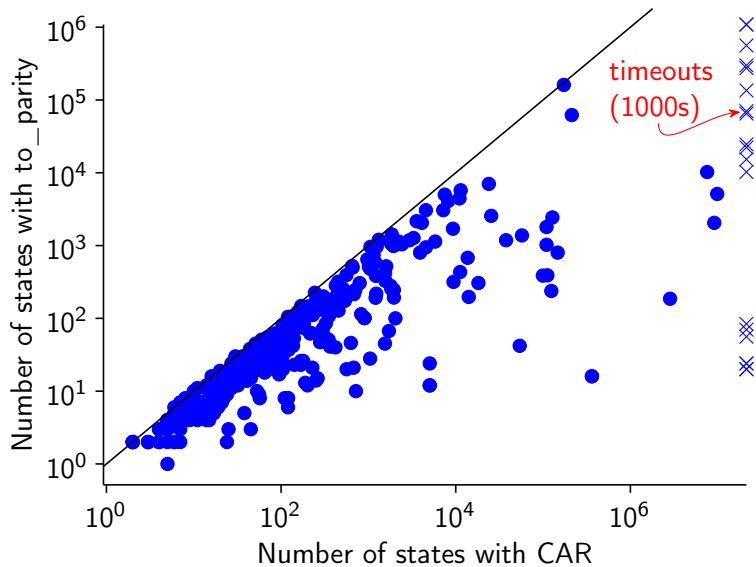

(*parity max odd*)
